EDUCATION

- **Medicaps University** Indore, India
Master of Technology in Computer Science & Engineering; GPA: 8.71 *Aug. 2022 – June 2025*
- **Sushila Devi Bansal College of Technology (Aff. to RGPV, Bhopal)** Indore, India
Bachelor of Technology in Computer Science & Engineering; GPA: 6.93 *Aug. 2018 – June 2022*

EXPERIENCE

- **Accenture** Gurugram, India
Associate Software Engineer *March 2026 - Present*
- **Medicaps University** Indore, India
Teaching Assistant *Oct. 2022 - Nov. 2025*
 - **Laboratory and Teaching Support:** Conducted lab sessions for B.Tech CSE students in Data Structures, Algorithms, and Database Systems; assisted in preparing and evaluating lab work.
 - **Academic Assistance:** Supported faculty in course material design, lab manuals, and student guidance for core technical subjects.
 - **Research and Departmental Engagement:** Contributed to faculty research and departmental projects through documentation, literature review, and technical support.
 - **Departmental Media and Outreach:** Managed departmental social media handles, increasing engagement by 30% through targeted academic and research content.

PATENTS

- [1] Indian Patent No. 202421088334 *“A Hybrid Blockchain Architecture Employing ML Models for Real-time Fraud Detection System,”* issued Dec 6, 2024. This invention integrates blockchain transparency with machine learning’s predictive capability to detect financial and e-commerce frauds in real time, using federated ML models, smart contracts, and hybrid public-private blockchain networks to preserve privacy and ensure adaptive fraud prevention.
- [2] Indian Patent No. 202311037100 *“System and Method for Fault Detection Using IoT and AI-powered Object Recognition in the Manufacturing Process by Industry 4.0,”* issued Jun 30, 2023. The system employs IoT sensors and AI-based visual recognition to identify and classify industrial faults in real time, enhancing predictive maintenance and minimizing production downtime in smart manufacturing environments.

CERTIFICATIONS

- [1] **Oracle Fusion AI Agent Studio Certified Foundations Associate**, Oracle, issued Dec 2025.
Skills: Oracle AI Agent Studio for Fusion Applications, Evaluating and Testing Agents, Monitoring Agents.
- [2] **Oracle APEX Cloud Developer Certified Professional**, Oracle, issued Sep 2025.
Skills: APEX Programming, PL/SQL, Application Security, Data Management, Generative AI. Credential: [View Certificate](#)
- [3] **ChatGPT Prompt Engineering: Examples & Use Cases**, Skillsoft, issued Aug 2025. Credential ID: 157549689. Credential: [View Certificate](#)
- [4] **Generative AI APIs for Practical Applications: An Introduction**, Skillsoft, issued Aug 2025. Credential ID: 157423855. Credential: [View Certificate](#)
- [5] **Delivery Practice School**, Accenture, issued Aug 2025. Credential ID: 157549692. Credential: [View Certificate](#)
- [6] **Fortinet Certified Associate Cybersecurity**, Fortinet, issued Jul 2024, expires Jul 2026. Credential ID: 8507199802VJ. Credential: [View Certificate](#)
- [7] **Fortinet FortiGate 7.4 Operator**, Fortinet, issued Jul 2024. Credential: [View Certificate](#)
- [8] **Google Cloud Fundamentals: Core Infrastructure**, Google, issued Jan 2023. Skill: Google Cloud Platform (GCP). Credential: [View Certificate](#)
- [9] **Set Up and Configure a Cloud Environment in Google Cloud**, Google Cloud Skills Boost, issued Jan 2023. Credential ID: 3110371. Credential: [View Certificate](#)
- [10] **Create and Manage Cloud Resources**, Google Cloud Skills Boost, issued Dec 2022. Credential ID: 2980784. Credential: [View Certificate](#)
- [11] **Perform Foundational Infrastructure Tasks in Google Cloud**, Google Cloud Skills Boost, issued Dec 2022. Credential ID: 2982082. Credential: [View Certificate](#)

PROJECTS

- [1] **Binary Classification of YouTube Trending Videos Using Engagement and Text Features (Research Paper)**
 - Co-authored a research paper analyzing YouTube trending videos using engagement metrics and text features; implemented classification models to predict trending status.
 - Performed feature extraction, model training, evaluation, and interpretation with Python libraries (e.g., pandas, scikit-learn); achieved competitive performance against baseline models.

- Documented findings and contributed to writing, visualization, and data curation; coordinated across collaborators from international institutions.

[2] Cricket Scorecard Automation

- Developed a CNN-based system to automate cricket scorecard generation by interpreting umpire hand gestures from image data.
- Achieved 98% accuracy, improving efficiency by 10% over baseline methods, and enhanced real-time decision-making in cricket scoring.

[3] Automated Disease Detection in Banana

- Designed a CNN-based image classification model to identify banana leaf diseases such as Bacterial Wilt, Fusarium Wilt, and Black Sigatoka.
- Outperformed VGG-16, ResNet-50, and EfficientNet models, reaching 96.1% accuracy with high precision and recall. Proposed a scalable framework for automated plant health monitoring.

[4] AWS-Enabled Cloud Database Integration

- Built a cloud-deployed application connecting a MySQL database on AWS, provisioning and managing EC2 compute resources for hosting services.
- Configured S3 buckets for reliable storage and defined IAM roles/policies to enforce secure, least-privilege access across AWS resources.
- Leveraged Linux environment and automation (Python/Bash) for deployment, monitoring, and routine maintenance tasks, demonstrating cloud operations competency.

[5] Plant Recognition System

- Built a deep learning model using CNNs to detect plant species from leaf images.
- Optimized for high-accuracy classification with potential scalability for plant disease detection in agricultural and botanical applications.

[6] Career Guidance System

- Developed a recommendation-based system to assist students in selecting suitable career paths.
- Integrated a rule-based matching engine with offline counseling support to enhance user satisfaction and accessibility.
